Brief Legal Description 509 ANTHONY RACE									

1. The first of these is the fact that the system is not a simple one, but a complex one, involving many different factors and many different people. The second is that the system is not a static one, but a dynamic one, which changes over time and in response to different circumstances. The third is that the system is not a closed one, but an open one, which interacts with the outside world in many different ways. The fourth is that the system is not a linear one, but a non-linear one, which can exhibit a wide range of different behaviors. The fifth is that the system is not a deterministic one, but a probabilistic one, which can only be described in terms of probabilities and uncertainties. The sixth is that the system is not a simple one, but a complex one, involving many different factors and many different people. The seventh is that the system is not a static one, but a dynamic one, which changes over time and in response to different circumstances. The eighth is that the system is not a closed one, but an open one, which interacts with the outside world in many different ways. The ninth is that the system is not a linear one, but a non-linear one, which can exhibit a wide range of different behaviors. The tenth is that the system is not a deterministic one, but a probabilistic one, which can only be described in terms of probabilities and uncertainties.
